What We Do

Engineering, Procurement & Construction (EPC)

ISI's EPC process integrates the latest technologies and proven methods, allowing ISI to develop unique solutions that meet each customer's specific needs.

Design & Construction

Turnkey Integration

Utility-Scale Power

Construction Management

Electrical Services

Communications

Automation

Facilities Management

Operations & Maintenance

Alternative Energy

Smart-Grid Infrastructure

Inglett & Stubbs International (ISI) is a global EPC firm focused on facility design, construction, operations, inspections, and maintenance. We operate in the private, public, and military sectors specializing in critical installations and maintenance.

>> Design

We take pride in our ability to manage projects for our customers from start to finish. We accomplish this by utilizing the extensive experience of our in-house team to perform conceptual design and equipment integration for each customer's specific needs. We then work with top-quality consulting firms to help finalize the design and engineering. This guarantees that our designs meet all required performance standards, with the added value of ISI's construction expertise.

>> Construct

We offer a **turnkey** construction solution, including general construction, civil, mechanical, electrical, communications, automation, plumbing, and all other necessary services to provide a complete project. We manage all aspects of the project with ISI employees, engage local labor, and local subcontractors to complete the work.

>> Operate

We understand that sustaining reliable operations is a critical function of business. A loss of power or an equipment failure could cost considerable time and revenue. We have over 60 years of experience serving a variety of customers in a wide range of difficult environments and facilities. This means we can provide our customers peace of mind, while utilizing the most efficient methods to reduce cost.

>> Inspect

We offer extensive experience in inspecting and certifying code compliance. We can also provide assessments to ensure that all equipment and operations are at their safest, most efficient, and cost effective states. Our qualified technicians proactively make recommendations for improvements to guarantee that our customers are receiving the best possible value.

>> Maintain

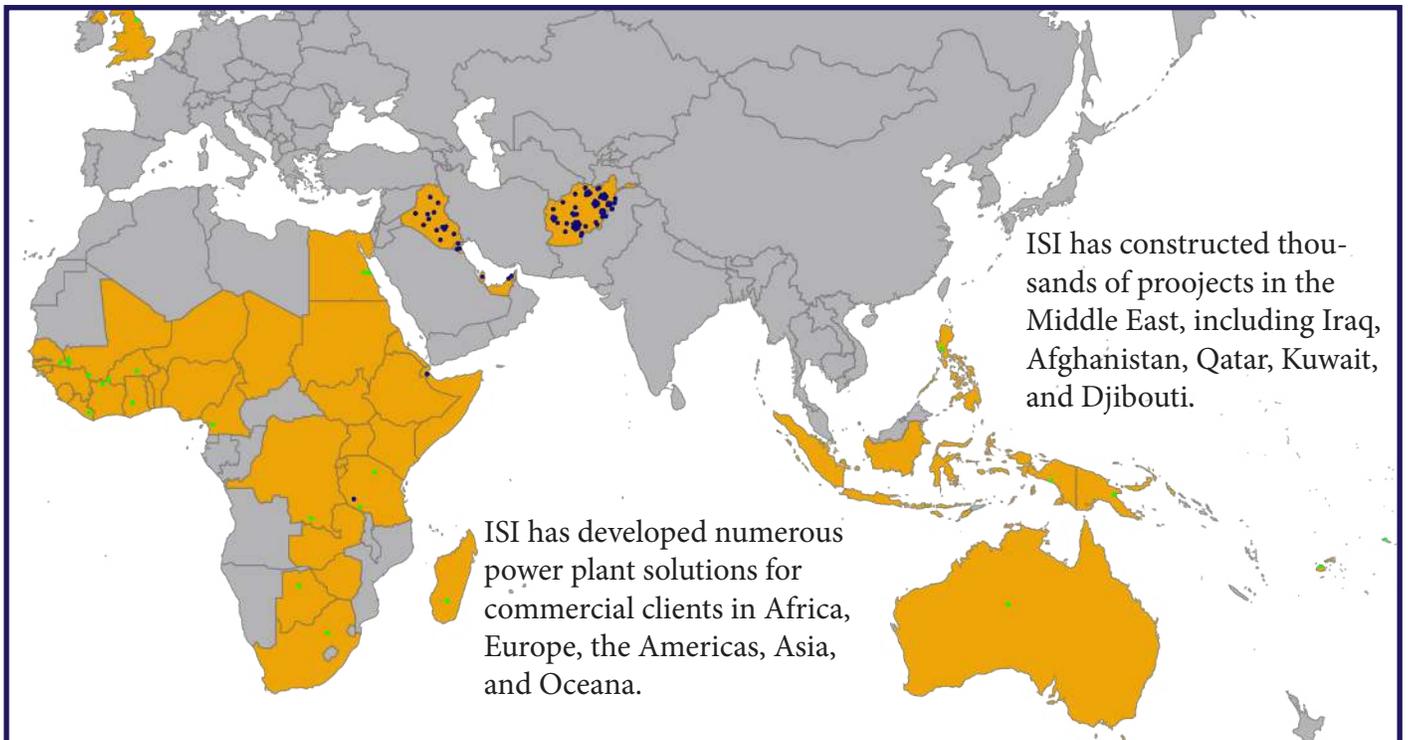

We continue to maintain equipment after it is furnished and installed, ensuring maximum longevity and optimal efficiency. Our in-house, custom Management, Acquisitions, and Tracking (MAT) software automates maintenance schedules and tracks all critical spare parts. This ensures that any piece of equipment can be repaired or maintained in a timely manner, preventing lost time or unexpected costs.

Turnkey Facilities

Engineering to Commissioning

Inlgett & Stubbs International (ISI) understands that each project has unique challenges and requirements. Our goal is to work with you to develop a specific approach that addresses critical stakeholder requirements, optimizes your capital expenditure, and minimizes your recurring operational costs, while ensuring that the project is completed on schedule and to the specified requirements. This approach allows us to provide turnkey solutions that meet our clients unique needs around the world. ISI has a long history of over 60 years experience in the construction industry providing exceptional services, while producing highly complex construction projects for our clients. We have constructed a varying range of projects in a variety of unique locations.

Multi-Site Maintenance & Support Contract	26 sites, Afghanistan	2011-2015	\$52,726,000
QTS Metro Data Center Construction & Maintenance	Georgia, USA	2007-2015	\$120,000,000

IN OUR CUSTOMERS' WORDS...

Over the past decade, The Inglett & Stubbs Group has performed over \$1.5B in private electrical construction projects, over \$1.5B in contracts acting as the prime contractor, and over \$50M in subcontracts for the U.S. Government. Our exceptional results as documented by our customers' feedback demonstrates that our highly skilled teams can perform any worldwide project, on time, within budget, and deliver a product that exceeds the customer's expectations.

Your team's knowledge, in both design and construction was vital in achieving our requirements with minimum disruption to our facility... It is a pleasure to work with a dedicated professional construction team such as Inglett & Stubbs

John Cummings, Director of Facilities Services
Northside Hospital

Without a doubt, in my forty years of Government service, Inglett & Stubbs has been, far and away, the best contractor I have ever worked with. This firm has my highest possible recommendation for award of any contract. This is a 'go-to' firm when something needs to be done.

William Bailey
USArmy Corps of Engineering, Contracting Officer
Worldwide Program Manager for USACE Power Support

"[ISI brings] skilled, industrious workers into an austere environment in order to make it safer for the boys out here fighting the harder fight. You have built a culture in your company that drives mission completion and go miles out of the way – oftentimes at expense to your company – to successfully complete the mission with first-time quality and on schedule. It is inspiring."

Program Manager, USFOR-A, TF Power
Afghanistan

"Your electrical work has exceptionally brought the Hilton up to US electrical code standards and significantly improved the living conditions as well as the life, health and safety of the facility. Furthermore, I commend you for the professionalism and courtesy given to the US military member by your employees."

Colonel, USAF, April 2011

"ISI has proven that they have the resources and knowledge to perform and succeed in the harshest of conditions. The personnel of ISI have been outstanding; everyone from the lineman to the management team seems attentive to the customer's requirements and concerns. Each one displays a commitment to quality work and a product that meets the intent of the customer's scope of work. ...the leading electrical contractor in Iraq."

USA Prime Power Supervisor, August 2009

"I can honestly say that this was the best support I have received."

USA Operations Sergeant,
Afghanistan April 2012

"(ISI) has ... distinguished themselves above their peers by exceptional performance in both routine and emergency work. ISI's dedication to quality, pride in all they do, and commitment to excellence are truly commendable and worthy of emulation and veneration. The Intelligence Community could not perform the missions we do without the superior support, outstanding leadership, and dedication of ISI's very talented workforce."

EN ICC HQ Commandant
Afghanistan

I cannot find a better electrical contractor to provide the world class service that we require, better than Inglett & Stubbs.

Lint Clements, Director,
Facilities Engineering
Wellstar Douglas Hospital
